

AIR SYSTEM PROTECTOR PLUS

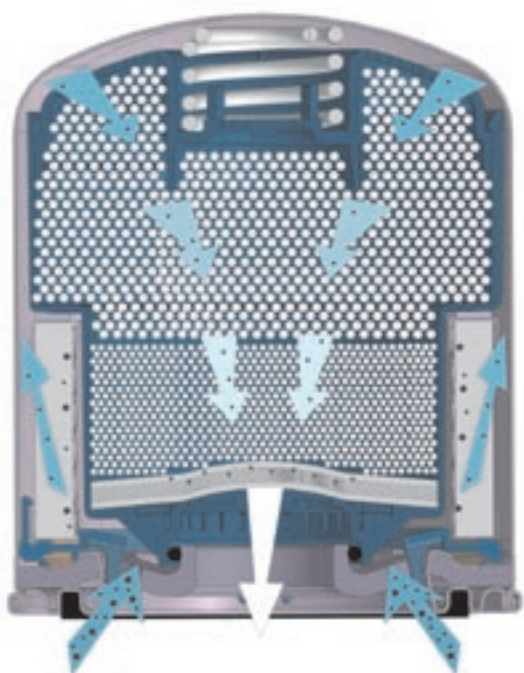

Air Dryer Cartridge
with Coalescing Filters

- Best drying **PERFORMANCE** with optimized design and new dual desiccant **TECHNOLOGY**
- Unique **DOUBLE FILTER** technology combining oil coalescing filters before and after the desiccant
- Recommended **EXCHANGE** interval extended by **50%**
- Applicable for **ALL VEHICLES**: a “must have” for vehicles with high air consumption

WABCO

The new generation of air brake system protection

EXPERIENCE A NEW GENERATION OF AIR BRAKE SYSTEM PROTECTION

- **Double filter technology:** unique combination of oil coalescing filters before and after the desiccant bed ensuring optimal separation of large oil droplets and fine aerosols
- **More desiccant:** newly designed inner container allowing more desiccant in the space available
- **Two layers of desiccant:** use of two different desiccant characteristics ensuring maximum drying performance

Robust design for best performance

BENEFITS

To improve safety, robustness and efficiency of commercial vehicles, WABCO developed the new Air System Protector^{PLUS} (ASP^{PLUS}). It offers maximum protection of the air brake system against oil, water and aerosols. With a recommended exchange interval of three years under normal conditions and the highest air drying performance, the ASP^{PLUS} sets a new standard in the cartridge market.

Increased safety and robustness

- The double filter technology – filtering BEFORE and AFTER the desiccant materials – protects the entire brake system against oil, water and aerosols

- The additional volume of desiccant material and the use of two desiccants with different characteristics will ensure best drying performance and prevent freezing or corrosion
- Stable drying and optimal oil separation performance is ensured over the exchange interval of the cartridge

Less maintenance and repair cost

- The optimal separation of harmful oil substances extends the cartridge exchange interval to three years under normal conditions, which represents an improvement of 50%

Versatility

- Applicable for mechanical and electronic air dryers

APPLICATIONS

The ASP^{PLUS} provides the most advanced air brake system protection for all vehicles in the market. In particular, the ASP^{PLUS} is a “must have” for vehicles with HIGH AIR CONSUMPTION like city buses, distribution and waste collection trucks as well as forestry, tank, construction and other special applications.

Different cartridges for different needs

WABCO Vehicle Control Systems (NYSE: WBC) is a leading supplier of safety and control systems for commercial vehicles. For over 140 years, WABCO has pioneered breakthrough electronic, mechanical and mechatronic technologies for braking, stability and transmission automation systems supplied to the world's leading commercial truck, trailer and bus manufacturers. With sales of \$1.5 billion in 2009, WABCO is headquartered in Brussels, Belgium. For more information, visit www.wabco-auto.com
